2 June 2023

**Proton Motor Power Systems plc  
("Proton Motor" or the "Company")**

### **New order from University of Stuttgart**

Proton Motor Power Systems plc (AIM: PPS), the designer and producer of hydrogen fuel cells and hydrogen fuel cell electric hybrid systems, is pleased to announce that it has received an order from the University of Stuttgart for a containerised fuel cell power plant with a power output of up to 240 kW.

The "HyShelter®" plant will be integrated into a large industrial hydrogen research proving ground and is expected to generate power and supply electricity to the grid from the second quarter of 2024.

This project fits well the Company's market approach to offer turn-key solutions to its customers. Proton's vision is to support customers providing climate neutral solutions for electricity and heating production. In this respect, Proton's portfolio addresses applications such as uninterruptible emergency power supply, peak shaving and off-grid charging infrastructure.

Proton Motor anticipates that the plant will be delivered to the customer in 2024 and revenues recognised in that year.
